

PART 1

The Big Idea

- **What product or service are you offering?**
"I am offering an open source AI called Nous AI."
- **What problem does it solve, or what fun does it bring?**
"The AI would fix code, help with assignment and promote ideas."
- **What makes your idea special or different?**
"It provides an extension tab where users can create and add plugins and the software would be completely free."

PART 2

Your Customers

Who needs or wants your product?

"The AI is needed by ages 13 - 65 to maintain daily productivity."

Where can you find these people?

"This people can be found on large communities like Scratch, Itch, GitHub and so on."

Why would they pick you instead of someone else?

"The reason is because people are looking for free and open source tools with high standard, and that's the definition of Nous AI."
